Energy Code Compliance

# I. Introduction

---

These *Guides* provide technical information and compliance support for the new *2002 Energy Conservation Construction Code of New York State*. These materials provide instructions and a set of documentation tools to assist users complying with the provisions of the new commercial Energy Code.

The Compliance Guides represent one of four commercial compliance paths provided for in the *2002 Energy Conservation Construction Code of New York State*. The four compliance paths include Chapter 7: ASHRAE Standard 90.1-1999, Chapter 8: Design By Acceptable Practice, *COMcheck-EZ* Software referred to in section 101.3.1 and this Manual worksheet approach (which is based on the COMCheck-EZ and Chapter 8 of the Code).

The *90.1 Users Manual to ASHRAE/IESNA Standard 90.1-1999* provides technical support and instructions for Standard 90.1-1999. It is a valuable technical resource for all four compliance paths.

Contacts and resources are listed in Section II, Scope and Application Guide. These Guides may be downloaded from the website at: <http://www.dos.state.ny.us/code/energycode/nyenergycode.htm>
